SafeAssign is now integrated into regular Blackboard Learn assignments. Use SafeAssign to review assignment submissions for plagiarism potential and create opportunities to help students identify how to properly attribute sources rather than paraphrase. SafeAssign is effective as both a deterrent and an educational tool. SafeAssign compares submitted assignments against a set of academic papers to identify areas of overlap between the submitted assignment and existing works.

SafeAssign is based on a unique text matching algorithm capable of detecting exact and inexact matching between a paper and source material. Submissions are compared against several databases:

- **Internet**: Comprehensive index of documents available for public access on the internet.
- **ProQuest ABI/Inform database**: More than 1,100 publication titles and about 2.6 million articles from 1990 to present time, updated weekly (exclusive access).
- **Institutional document archives**: Contains all papers submitted to SafeAssign by users in their respective institutions.
- **Global Reference Database**: Contains papers that were volunteered by students from Blackboard client institutions to help prevent cross-institution plagiarism.

**HOW TO USE SAFEASSIGN IN YOUR ASSIGNMENTS**

You can now use SafeAssign plagiarism checking for any of your assignments.

1. On the Create Assignment page, expand **Submission Details**.
2. Select **Check submissions for plagiarism using SafeAssign**.
3. Optionally, select one or both options:
   a. Allow students to view the SafeAssign originality reports on their submissions.
   b. Exclude all student submissions for this assignment from the institutional or global reference databases.
4. Complete the Create Assignment page.
5. Click **Submit**.
