 - d. **Number of Submissions to Evaluate** – How many submissions from other students will each original submitter evaluate?
6. Choose other options if desired (availability)

7. Click **“Submit.”**
8. Select **“Create Question.”**
9. If you are wanting students to make comments on the students paper only, enter the question as **“Submit/Attach Your Paper Here.”**
10. Create criteria for the question. Click the dropdown menu for the question, and select Criteria.

11. Click on **“Create Criteria.”**
12. Enter desired criteria.
An example criteria would be **“What comments do you have on this paper? Please include page number, example sentences, etc. to help this student locate where your comments are referring.”**
13. Provide the **“Possible Points”** for this criteria item.
14. Select to make it **“All or Nothing”** or **“Partial Credit.”**
 - a. **All or Nothing** – reviewers can only assign all possible points for this question, or none of the possible points.
 - b. **Partial Credit** – reviewers can assign any desired possible points within the range of points you have set.

Please note: Peer evaluations must be made as text within the system, and cannot be made directly on the paper. This is why information such as page number, example sentence, etc. will be helpful for the original submitter to locate relevant information within their paper.

Other things to note:

- **Once Submission or Evaluation Dates have ended students cannot participate** in submitting their own paper to be peer reviewed, or peer reviewing other students papers (as appropriate).
- **Dates CANNOT be changed after a date has passed.** Please ensure that dates are setup correctly before the assignment become available to students.
